CUSTAR Tutor: learner app flow

Milestone M1 (local-first walking skeleton) · demo mode, run in a browser at phone width · 12 Oct 2026

What this shows

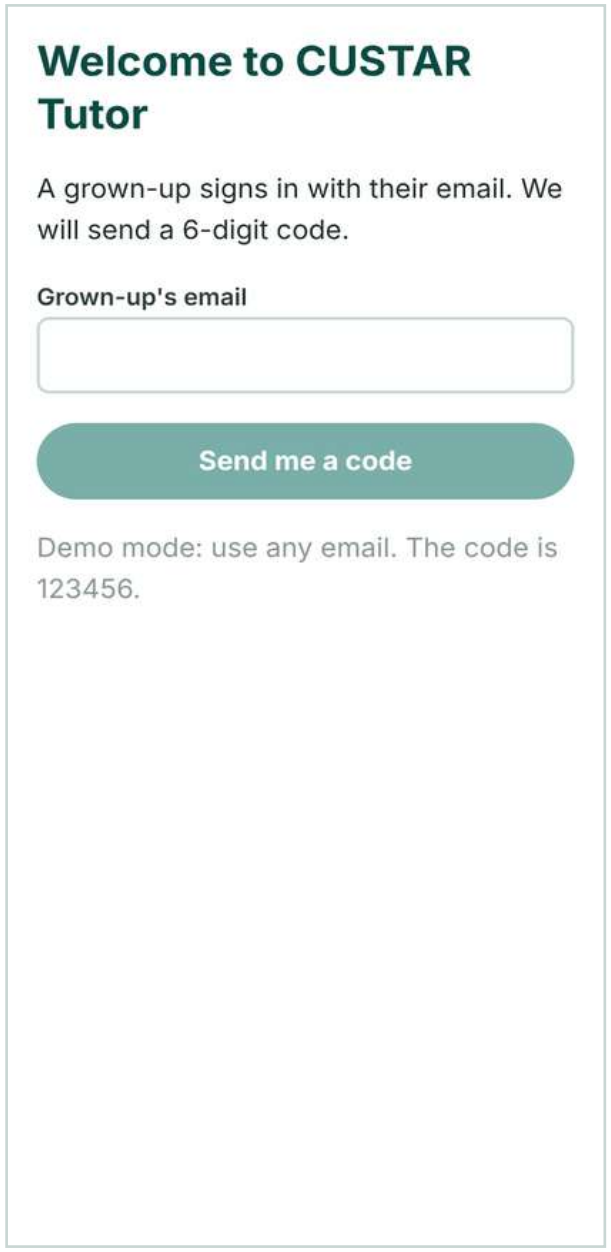

- The real learner app (apps/learner) running its full journey: sign in, PIN, pick a child, download a lesson, play it, pass the mastery check, open the grown-ups ar
- Captured by an automated browser run (apps/learner/scripts/e2e-demo.mjs) against the in-memory demo server; the lesson is the golden Unit 2 from your temp

What it does not show

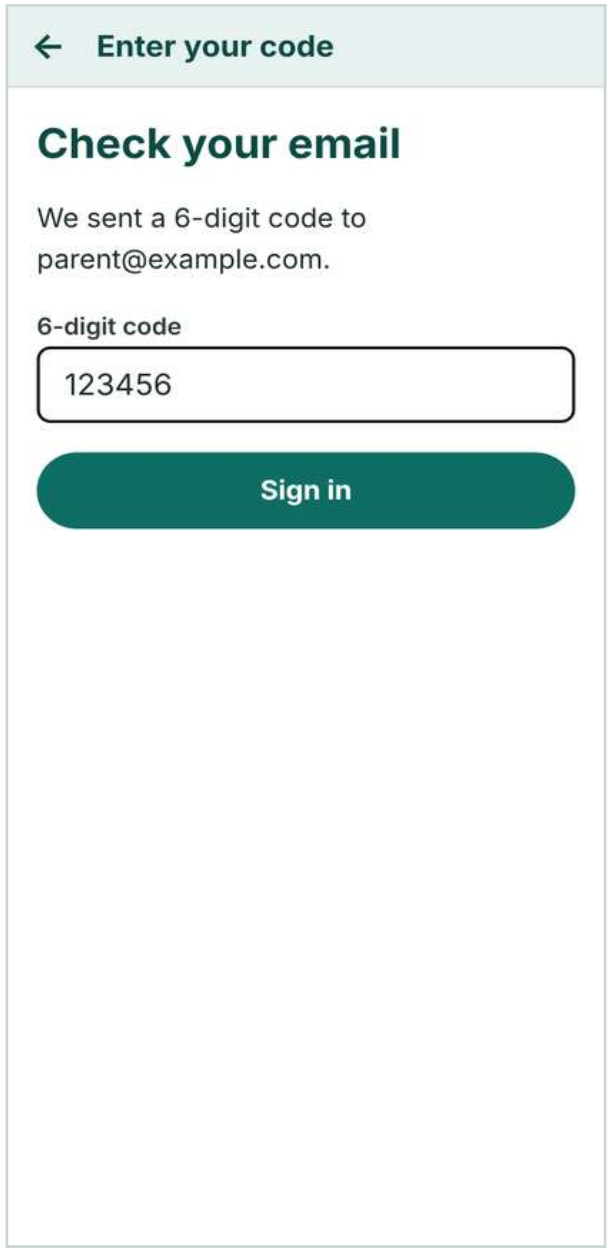

- It was not run on a phone: offline behaviour, the on-device database and the Keystore still need a real Android device (M1 device test).
- It does not use the real Supabase backend yet (the server half of M1 is still being finished and verified).
- No tutor chat, voice or worksheets yet. Illustrations are placeholders until pictures are attached.

Sizes are compressed for sharing. Source screenshots can be regenerated with the e2e script.

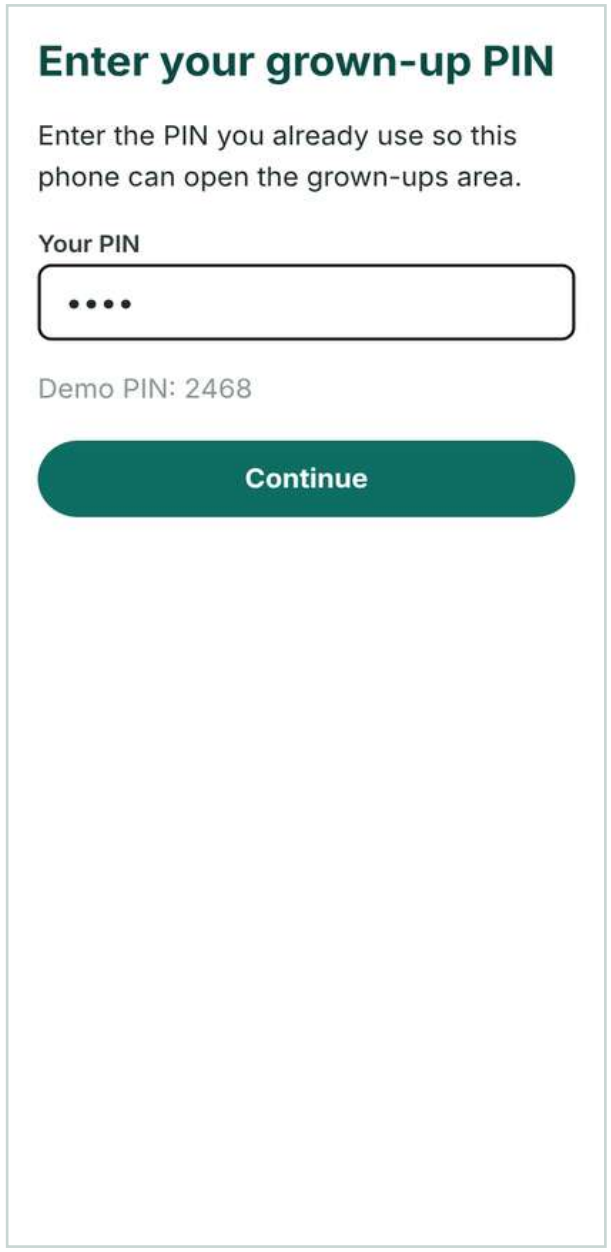

Learner app flow (demo mode)

1. Sign in
A grown-up signs in with their email and a 6-digit code.

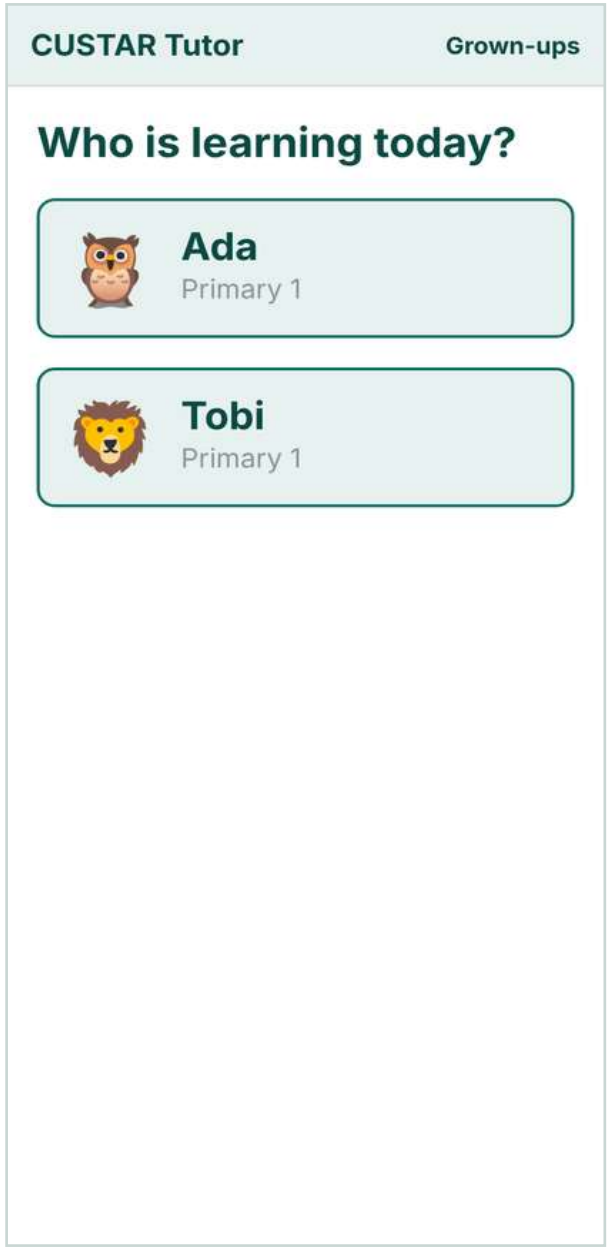

2. Enter the code
Demo mode accepts the code 123456.

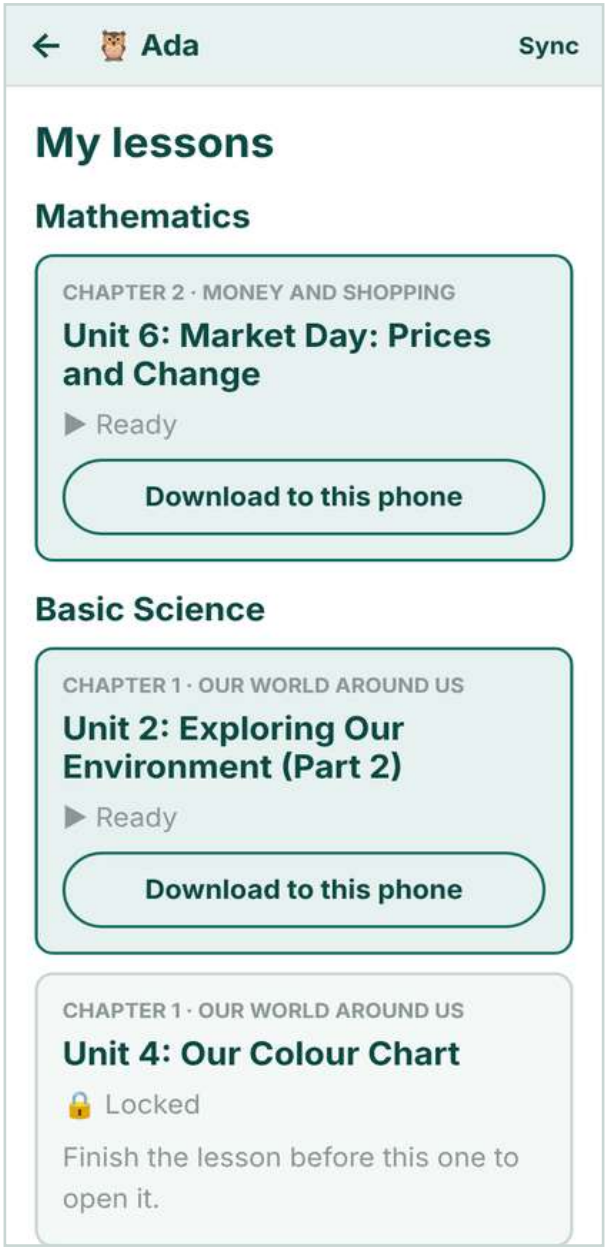

3. Grown-up PIN
On a new phone the existing PIN is entered; first time, a PIN is created. Checked by the server.

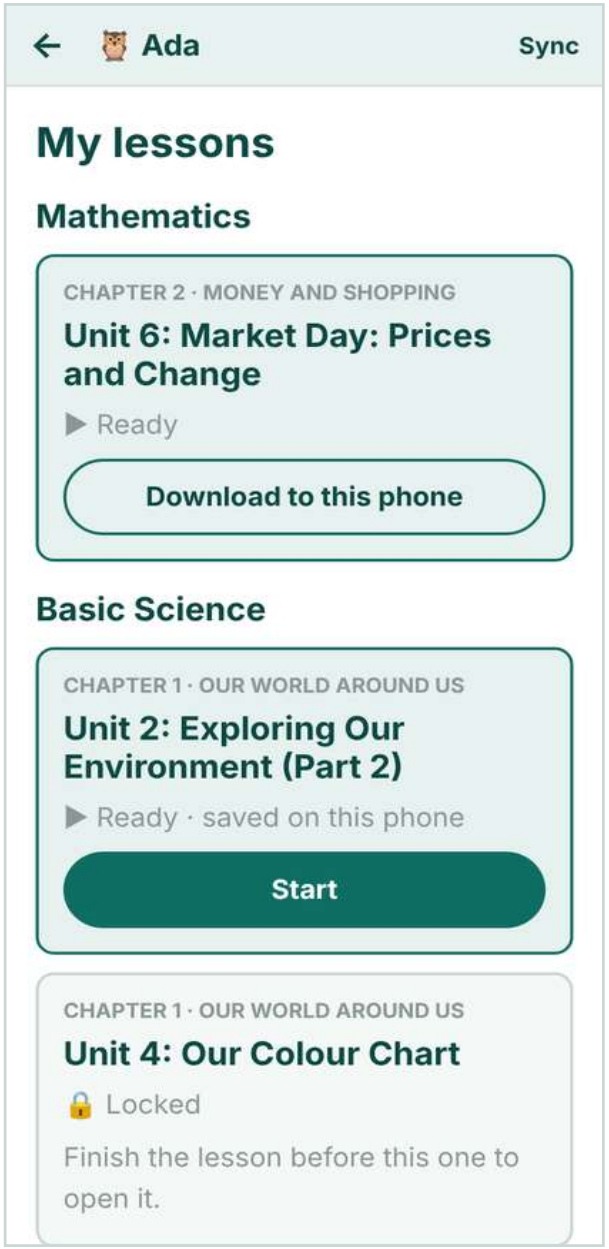

Learner app flow (demo mode)

4. Who is learning?
Child mode is the default. Grown-ups is one tap away but PIN-protected.

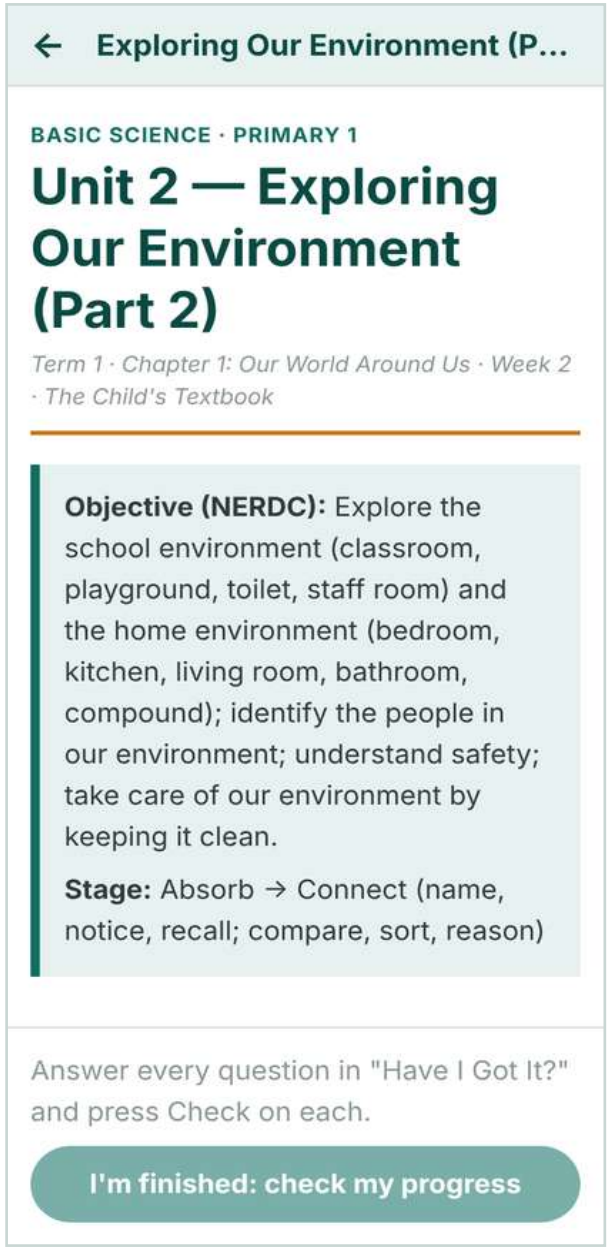

5. My lessons
Units per subject. Later units are locked until the lesson before is mastered.

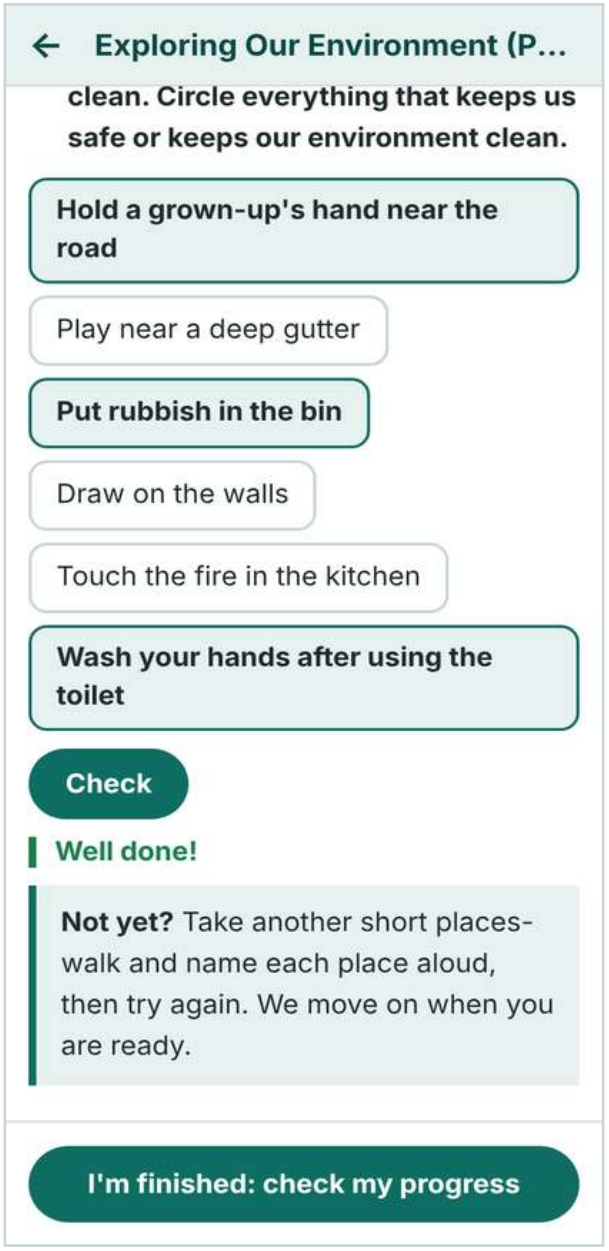

6. Downloaded
After a Wi-Fi download the lesson is saved on the phone and can be played offline.

Learner app flow (demo mode)

7. Lesson player
The NERDC objective first, then sections. The finish button waits for the mastery questions.

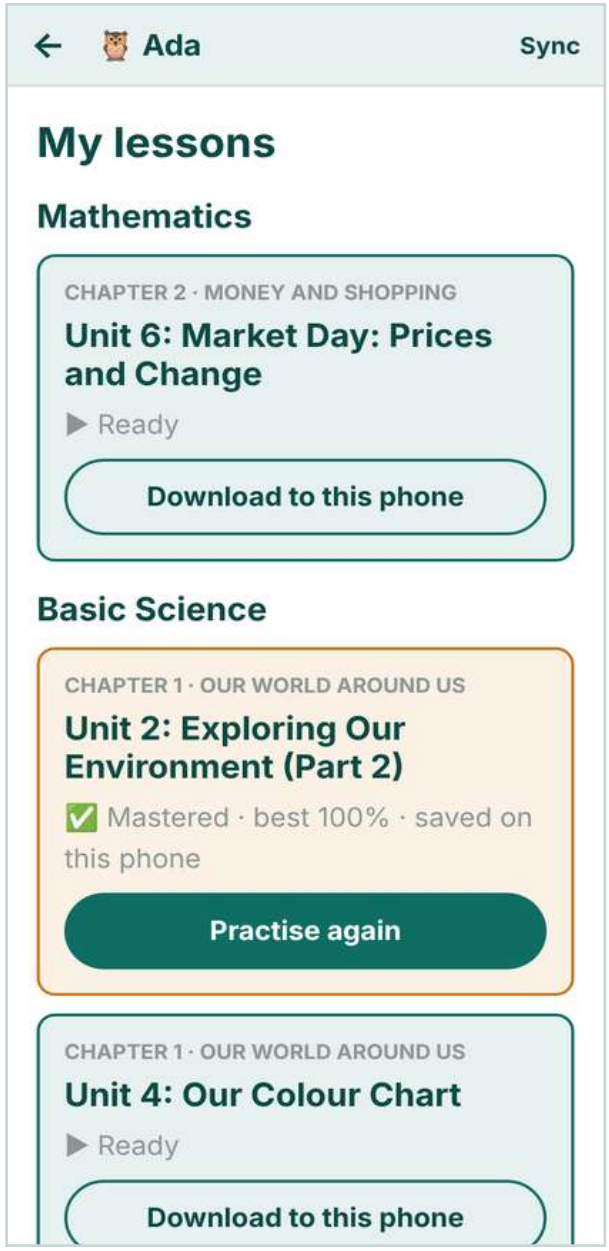

8. Mastery check
Answers are graded on the device. Only this check can grant mastery.

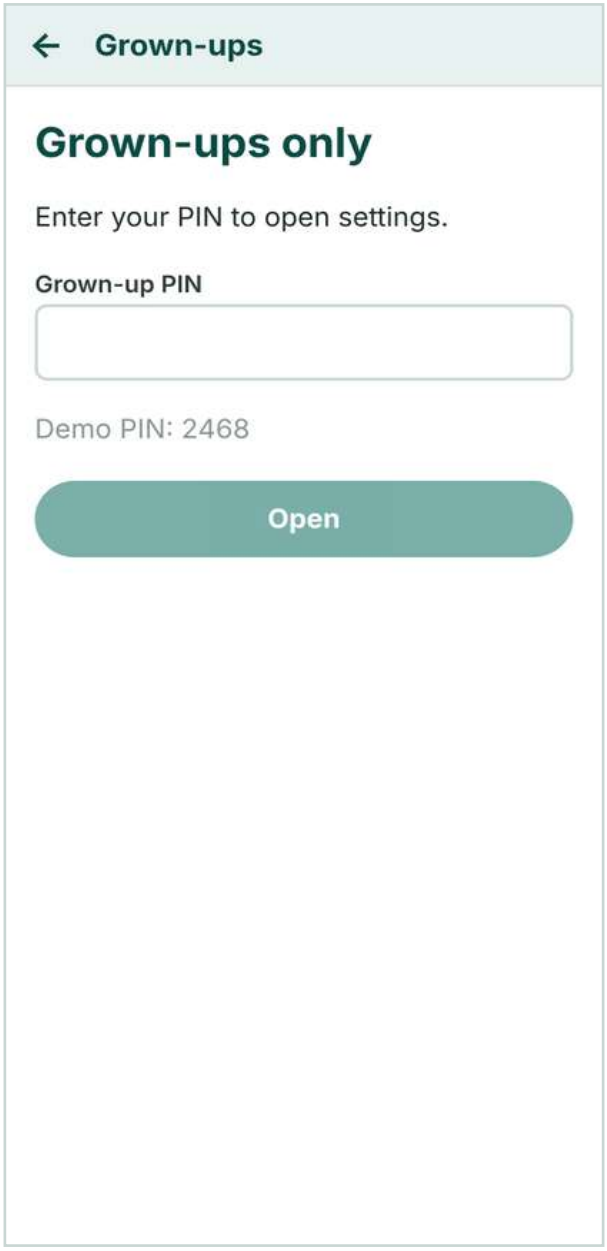

9. Result
Passing needs 80%. A fail shows the Not yet guidance and offers another try.

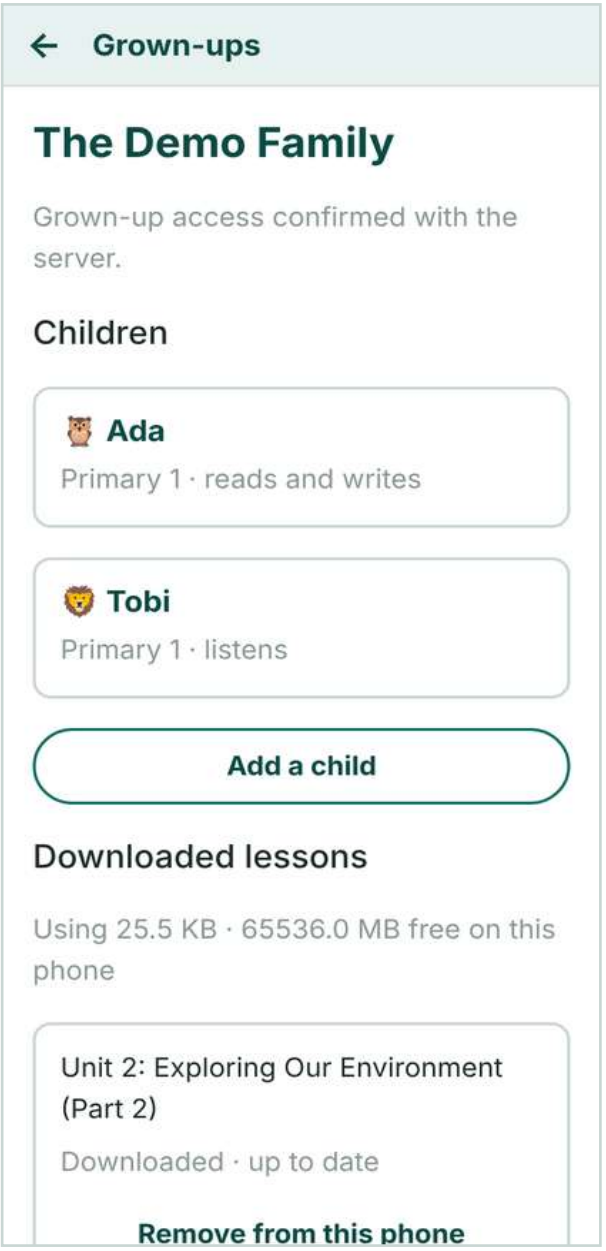

Learner app flow (demo mode)

10. Next lesson unlocked
Unit 2 shows Mastered and the next unit is open. Works offline; syncs later.

11. Grown-ups gate
PIN required. Wrong PINs are rejected and repeated failures lock the gate.

12. Grown-ups area
Children, downloaded lessons and storage, sync status, sign out.
