CUSTAR Tutor

UI screens built so far · Milestone M0 (foundation), work in progress · 11 Oct 2026

What you are looking at

- The lesson renderer: the React Native code the learner app will use, shown here in the admin preview at phone width (390 px).
- Real content: the golden unit transcribed from your template, a P1 Maths unit and a mini project (the fixtures built in M0).
- Long pages are sampled into phone-sized frames, numbered "Screen n of N" so you can see where each sits in the scroll.
- The bar above each screen in the preview (All units / student / grownup / admin) is admin preview chrome, not learner UI.

Not built yet (so not shown)

- Learner app shell: sign-in, child profile picker, grown-ups PIN, home screen and lesson player (M1).
- AI tutor chat, voice, offline downloads and sync (M1 to M5). Admin content engine: scheme upload, Claude generation and review (M2).
- Illustrations: dashed boxes are placeholders that show the illustration brief until pictures are attached.

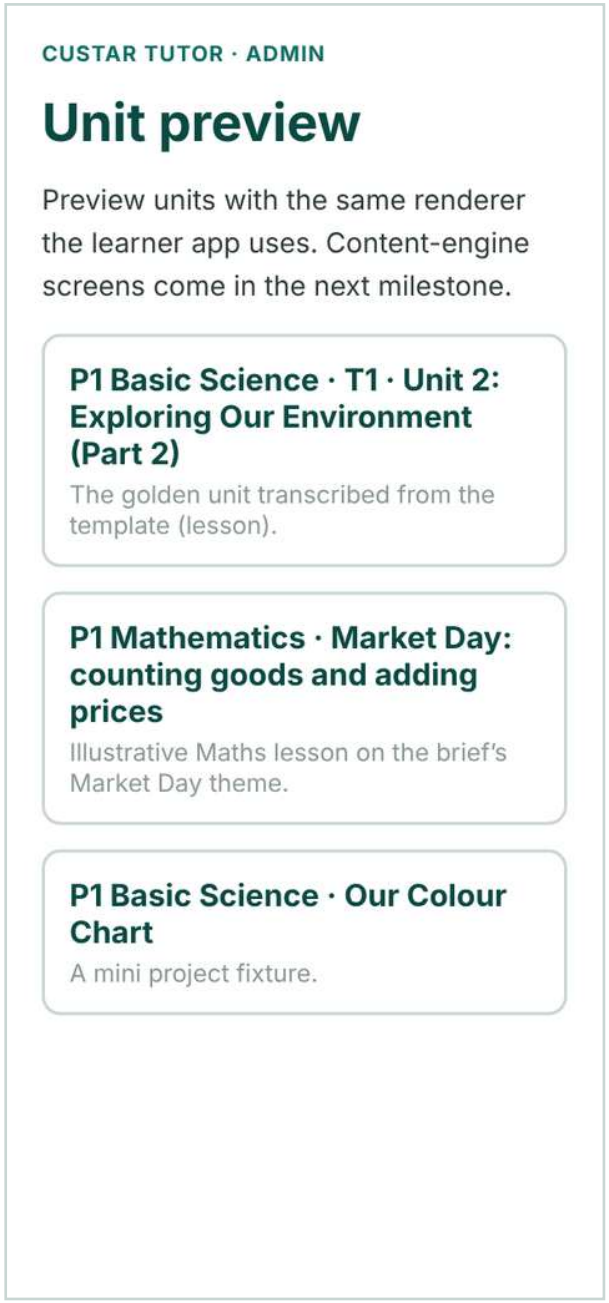

How to read the colours

- Teal bars = CORE (the NERDC scheme objective, always dominant). Amber bars = ENRICH (depth added around the objective).
- Child view hides the CORE / ENRICH badges and the teacher's manual; grown-up view shows them.

Generated from apps/admin (Expo web export) with Playwright. Source: docs/plan.md, packages/lesson-renderer, packages/content-schema fixtures.

Admin home: unit preview list

The only admin screen so far. It lists the three unit fixtures and opens each in the shared renderer. Content-engine screens arrive in M2.

BASIC SCIENCE · PRIMARY 1

Unit 2 — Exploring Our Environment (Part 2)

Term 1 · Chapter 1: Our World Around Us · Week 2 · The Child's Textbook

> **Objective (NERDC):** Explore the school environment (classroom, playground, toilet, staff room) and the home environment (bedroom, kitchen, living room, bathroom, compound); identify the people in our environment; understand safety; take care of our environment by keeping it clean.
>
> **Stage:** Absorb → Connect (name, notice, recall; compare, sort, reason)

Textbook | Workbook

Come and Explore! (Our Story)

Zari and Zuri now know that their environment is everything around them.

- The **playground** — where we play.
- The **toilet** — where we wash and keep clean.
- The **staff room** — where our teachers work and rest.

Places in Our Home

Our home has many places too:

- The **bedroom** — where we sleep.
- The **kitchen** — where food is cooked.
- The **living room** — where the family sits together.
- The **bathroom** — where we bath and keep clean.
- The **compound** — the open space around the house.

People in Our Environment

We are not alone. There are people all around us:

- At home: our **family** — mummy, daddy, brothers and sisters.
- At school: our **teachers** and our **friends**.
- Near our home: our **neighbours**.

Let's Look Together (Examples)

Example 1 — Places Where do we cook food? The kitchen. Where do we sleep? The bedroom. Where do we learn? The classroom.

Example 2 — People Who teaches you at school? The teacher. Who lives beside your house? A neighbour.

Example 3 — Safe or not? Point to one safe thing and one thing that is not safe that you can see right now.

Do & Discover: Our Places Walk

Walk with your teacher around the school. As you go:

- **NAME:** each place you pass — classroom, playground, toilet, staff room.
- **TELL:** what we do in each place.
- **GREET:** wave and greet one person you meet — a teacher or a friend.

At home: with a grown-up, walk through your home and name every room.

Unit 2 — Exploring Our Environment (Part 2)

Term 1 · Chapter 1: Our World Around Us · Week 2 · The Child's Textbook

Objective (NERDC): Explore the school environment (classroom, playground, toilet, staff room) and the home environment (bedroom, kitchen, living room, bathroom, compound); identify the people in our environment; understand safety; take care of our environment by keeping it clean.

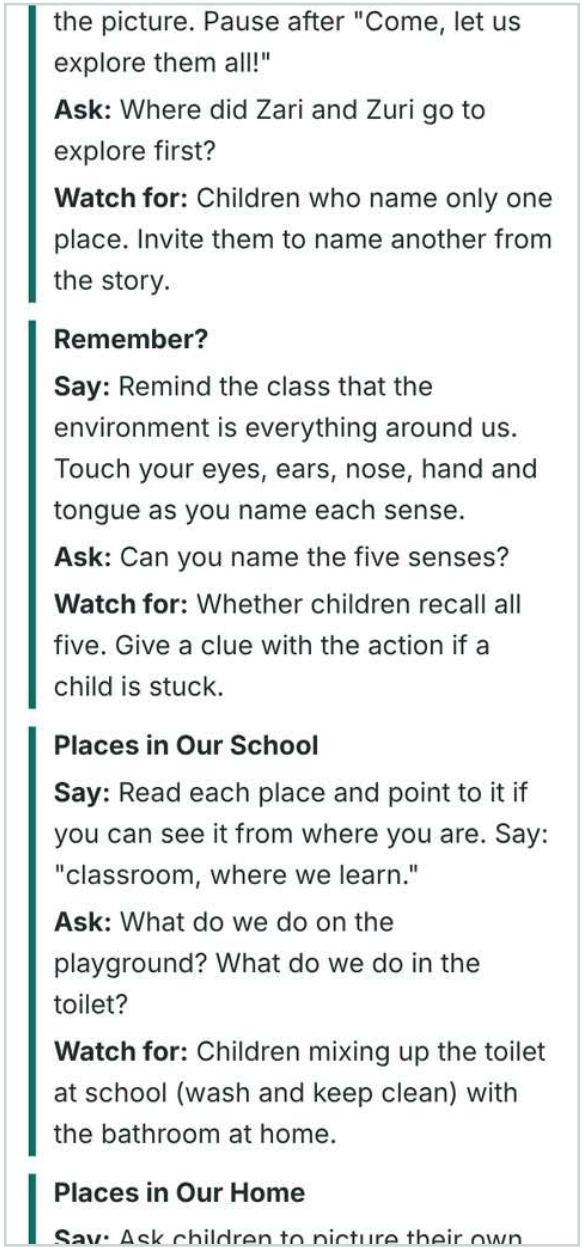

Stage: Absorb → Connect (name, notice, recall; compare, sort, reason)

Textbook Workbook Teacher's mar

Timing

Two 60-minute periods. Period 1: story and recall (10), places in school and home (15), Our Places Walk (15), oral practice

Screen 1 of 9

the picture. Pause after "Come, let us explore them all!"

Ask: Where did Zari and Zuri go to explore first?

Watch for: Children who name only one place. Invite them to name another from the story.

Remember?

Say: Remind the class that the environment is everything around us. Touch your eyes, ears, nose, hand and tongue as you name each sense.

Ask: Can you name the five senses?

Watch for: Whether children recall all five. Give a clue with the action if a child is stuck.

Places in Our School

Say: Read each place and point to it if you can see it from where you are. Say: "classroom, where we learn."

Ask: What do we do on the playground? What do we do in the toilet?

Watch for: Children mixing up the toilet at school (wash and keep clean) with the bathroom at home.

Places in Our Home

Say: Ask children to picture their own

Screen 3 of 9

home as you read each room. Let two or three children describe their kitchen.

Ask: Which room do you like best, and why?

Watch for: Children whose homes have no separate living room; accept their own words for the family sitting place.

People in Our Environment

Say: Draw three circles on the board: home, school, near our home. Write one group of people in each.

Ask: Who lives in your house? Who lives beside it?

Watch for: Children who name only the immediate family; remind them that neighbours and friends are part of the environment.

Staying Safe in Our Environment

Say: Read the safety rules calmly and do the action for each (hold a hand, point to the bin). Keep it warm, never scary.

Ask: What should you do if something is not safe?

Watch for: Anxiety. Stress that telling a grown-up is the brave and sensible thing to do.

Screen 4 of 9

Teacher's manual (grown-up view only)

Timing per period, say / ask / watch-for script, materials, mastery guidance and the helper script for a human co-pilot.

Ask: Why do we cook food in the kitchen and not in the bedroom?

Watch for: Reasons about safety and cleanliness. Praise the thinking, not only the answer.

Quick-Fire! (Answer Fast)

Say: Fire the five questions fast. Children answer aloud, together or one by one.

Ask: Where do we learn in school? Where is food cooked at home?

Watch for: Hesitation. Repeat the question once, then move on and come back.

Have I Got It? (Mastery Check)

Say: Give each child the three mastery questions on their own. Do not help with the answers.

Ask: Can you put each place where it belongs?

Watch for: Which of the three "I can" statements each child cannot yet do.

Theme map

Basic Science (Observation): Names and describes the places and people in school and at home.

English Studies (Language): Says "In my home there is a ... and a ..." and names rooms aloud.

Social Studies (Community): Finds out who lives and works around us.

Mathematics (Value): Counts the rooms in a home and the people in a family.

Civic Education (Behaviour): Keeps the places we share clean and safe.

> **Connection moment:** Today we looked at our school and our home as scientists who observe, as speakers who name things, and as helpers who keep our places clean and safe.

Materials

- Chalk or marker and a board, to list places and people.
- Crayons or coloured pencils and each child's notebook, for the My Notebook drawing.
- A bin or basket, to show that rubbish goes in the bin.
- Picture cards of school and home places (optional; hand-drawn is fine).

- Read each place aloud and point to the picture or the real place.
- Ask the child to say the place and what we do there.
- Praise every try. Say the right word gently if the child is unsure.

Do & Discover: Our Places Walk

- Walk slowly with the child through the school or the home.
- At each place, ask: What is this place? What do we do here?
- Help the child greet one person politely.

Have I Got It? (Mastery Check)

- Read each mastery question aloud and let the child tap the answer.
- Do not give hints or answers during the check.
- If the child is not yet ready, do a short places-walk and try again another day.

Second subject: Mathematics (Market Day)

Illustrative P1 Maths unit on the brief's Market Day theme. Shows the same renderer works across subjects.

← All units **student** grownup admin

MATHEMATICS · PRIMARY 1

Unit 6 — Market Day: Prices and Change

Term 2 · Chapter 2: Money and Shopping · Week 9 · The Child's Textbook

> **Objective (NERDC):** Count goods, read prices in naira and kobo, add two purchases, and find change (using coins up to 10 naira).
>
> **Stage:** Connect (compare, sort, reason)

Textbook Workbook

Come to the Market!

Saturday is market day. Zari and Zuri go to the market with Mama.

Zuri: Look at all the oranges! How many are there?

Trader: Count them and see! Each orange costs ₦2.

Zari: We have ₦10. What can we buy?

Orange	₦2
Mango	₦3
Groundnuts	₦4
Bread	₦7

Today we use whole naira coins up to ₦10.

Adding Two Purchases

Sometimes we buy two things. We add the two prices to find the total.

total

All the money for everything we buy.

A banana costs ₦1. Groundnuts cost ₦4. We add: 1 + 4 = 5. The total is ₦5.

Finding Change

We often pay with a coin that is more than the price. The trader gives some money back.

change

The money the trader gives back to us.

To find the change, take the price away from the money we gave.

Money given − price = change

Let's Shop Together (Examples)

Example 1 — Counting There are 6 oranges on the tray. We count: 1, 2, 3, 4, 5, 6. There are 6 oranges.

Example 2 — Adding A mango costs ₦3. An orange costs ₦2. We add: 3 + 2 = 5. We pay ₦5.

Example 3 — Change Zuri pays ₦10 for bread that costs ₦7. We take away: 10 − 7 = 3. The trader gives ₦3 change.

Do & Discover: Play Market

Set up a pretend market in your classroom or at home.

- **SET UP:** Put fruit, bottle caps or pictures on a table. Write a price on a card for each one.
- **BUY:** One child is the trader. The other buys two things and adds the prices.
- **GIVE CHANGE:** Pay with a paper ₦10 coin. The trader works out the change and gives it back.

Swap places. Then the buyer becomes the trader.

Second subject: Mathematics (Market Day)

Mini project

"Our Colour Chart": brief, steps, materials, rubric and evidence options.

← All units student grownup admin

BASIC SCIENCE · PRIMARY 1

Unit 4 — Our Colour Chart

Term 1 · Chapter 1: Our World Around Us · Week 4 · Mini Project

Objective (NERDC): Identifying primary colours: red, blue, yellow; identifying secondary colours: green, orange, purple; identifying other common colours: black, white, brown, pink, grey; colours in our environment: colour of sky, grass, sun, etc.; sorting and grouping objects by colour; mixing colours (practical activity with paints/crayons).

Stage: Absorb → Connect (name, notice, recall; compare, sort, reason)

What we will make CORE

Make a colour chart of the world around you. Find things of each colour, sort them into boxes, and mix two colours to make a new one.

Screen 1 of 5

Steps CORE

1. Take a big sheet of paper. Draw 12 boxes on it, 3 boxes across and 4 boxes down.
2. Write a colour name at the top of each box: red, blue, yellow, green, orange, purple, black, white, brown, pink, grey. Leave the last box for "My mix".
3. Go on a colour hunt at school or at home with a grown-up. Find small safe things of each colour: leaves, fallen petals, cloth scraps, bottle caps, old paper.
4. Stick or draw each thing in the box with its colour. Look at the colour of the sky, the grass and the sun, and colour a small picture of each.
5. Mix colours with crayons or paints. Yellow and blue make green. Red and yellow make orange. Red and blue make purple. Colour your best mix in the "My mix" box.
6. Show your chart to a grown-up. Point to each box and say the colour out loud.

Screen 2 of 5

What you need CORE

- A big sheet of paper, or a flattened cardboard box.
- Crayons or coloured pencils (or paints and a brush).
- Starch paste, gum or tape to stick things down.
- Small safe things from home or school: leaves, fallen petals, cloth scraps, bottle caps, old magazine pictures.
- A cup of water and an old rag, if using paints.

How we will look at it CORE

Names colours

1. Names one to three colours, with help.
2. Names the three primary colours: red, blue and yellow.
3. Names the primary and secondary colours.
4. Names primary, secondary and other common colours without help.

Sorts by colour

Screen 3 of 5

Mini project

"Our Colour Chart": brief, steps, materials, rubric and evidence options.

Sorts by colour

1. Puts some things in the right box, with help.
2. Puts most things in the right box.
3. Puts every thing in the right box.
4. Sorts every thing and can say why it belongs in its box.

Mixes colours

1. Tries mixing two colours, with help.
2. Mixes two colours and says the new colour.
3. Mixes two different pairs and names both new colours.
4. Says which two colours make green, orange and purple.

Care and tidiness

1. Needs reminders to tidy up.
2. Tidies up when asked.
3. Keeps the work area tidy and puts rubbish in the bin.

Show it CORE

Share your work as: photo, drawing, audio, text.

Think: Which colour did you find the most

Screen 4 of 5

things of?

Think: Which two colours did you mix, and what new colour did you make?

Think: What colour is the sky? The grass? The sun?

Screen 5 of 5
